

Dynamic LightPanel

Addressing & Programming

EOS provides Dynamic panels unaddressed (All panels address will start at 1)

- All panels independently will follow the same sequence at the same time.

Pre-addressed panels available upon request

- Additional details for addressing required from customer.

Upon purchase of EOS DMX controller, EOS provides 1-6 basic programmed scenes

- 4 basic colors (R, G, B and W) for the first 4 scenes
- 5th - rainbow chasing sequence
- 6th - random program
- Additional programs available upon request (extra charge)

If DMX controller is not purchased from EOS, programming will have to be performed by client.
